Klean Bio-Zone is a process that goes further than clean, into the unseen world of microbial contamination using a true sterilant and non-touch aseptic technique for infection control and high-level decontamination.

Infection Control on Surfaces and Air for Respiratory Diseases and COVID-19 virus.

Respiratory infection transmission we know happens when droplets are expelled in the air as infected people breathe, talk, shout, etc. Controlling surface and air hygiene by systematically treating them can greatly reduce the probability of this occurring. This requires a Proactive Plan in the form of a program. When what you are trying to control is invisible, your program requires equipment and methods whose results are based on science. Both the CDC, in its Guide for cleaning and disinfecting, and the EPA's IAQ Tools for Schools greatly recommend a program of this type.

FROM: CDC, EPA, & FDA, IMPLEMENT *"INFECTIOUS DISEASE PREPAREDNESS AND RESONSE PLAN"*.

AND IMPLEMENT AN *"ENVIRONMENTAL HYGIENE CLEANING & DISINFECTION PROGRAM"*

CLEANING by spraying a disinfectant and wiping of surfaces is not good enough!

RESPIRATORY and AIR-BORNE DISEASES are the leading causes for

ABSENTEEISM in Schools and Businesses!

Schools, and Public Places Goals are :

CLEANING and DISINFECTING of SURFACES and in the AIR that you BREATHE!

Now the CARES Act, trying to get the pandemic under control, requires a plan in order to receive funds allocated for just that purpose. Renewed guidance from the federal government to educational institutions calls for intensified routine disinfection coupled with regular cleaning as a best practice measure. Klean Bio-Zone has been developed with the ability to form a program that does just that. It can be applied swiftly, cost effectively, doesn't have to be cleaned up and can be done with a facilities own personnel with a little training.

PRICING/TERMS

FULL-SERVICE OPTION (new pricing)

- **NEW PRICE \$0.12/SF** – If you would need CPG, to provide a full decontamination service per our accepted and approved vendor status with KPC (Kentucky Purchasing Cooperatives) to Kentucky schools.
